

User Icon > Settings

The Brand Tab of the Settings Page contains global settings to help ensure brand consistency across your marketing campaigns. There are two sections on the Brand Tab: Preferred Fonts and Custom Colors.

In this article:

- [Preferred Fonts](#)
- [Brand Colors](#)

For changes made on this page, be sure to click "Save" in the top right corner before leaving the page!

Preferred Fonts

The Preferred Fonts section of the Brand tab allows you to:

1. Limit fonts available in the Email Builder & Landing Page Builder to the fonts you regularly use.
2. Declare additional custom web fonts to be used in your marketing material.

By default, the setting for Preferred Fonts on this page is set to **Use all Default Fonts**. This means that the full list of fonts, listed below, will be available to you in the Email & Landing Page Editors.

Here's all the fonts that are available out-of-the-box:

- Arial
- Courier
- Georgia
- Helvetica Neue
- Lucida Sans
- Tahoma
- Times New Roman
- Trebuchet MS
- Verdana
- 𠄎𠄎𠄎𠄎 Pro W3 (Hiragino Kaku Gothic Pro W3)
- 𠄎𠄎𠄎 (Meiryo)

- Bitter
- Droid Serif
- Lato
- Open Sans
- Roboto
- Source Sans Pro
- Montserrat
- Ubuntu

If you'd like to limit this list of fonts or import other fonts from the web, change the selection in the drop-down to **Use Preferred & Custom Fonts**. Upon changing this selection, you'll be able to click the tiles for the fonts you plan to use in the Editors. Additionally, clicking the **Add Custom** tile at the end of the list will allow you to pull a public web font into Ascent360.

Use Preferred & Custom Fonts ▼

Axg Arial	Axg Courier	Axg Georgia	Axg Helvetica Neue	Axg Lucidia Sans	Axg Tahoma
Axg Times New Roman	Axg Trebuchet MS	Axg Verdana	Axg Bitter	Axg Droid Serif	Axg Lato
Axg Open Sans	Axg Roboto	Axg Source Sans Pro	Axg Montserrat	Axg Ubuntu	+ Add Custom

The selected fonts here will be the only fonts that appear in the Email & Landing Page Editors. Emails or Landing Pages that are already saved with other fonts will be unaffected.

Add a Custom Font

You may add custom web fonts by clicking the **Add Custom** tile at the end of the list.

FONT NAME

Smooch

FONT URL

https://fonts.googleapis.com/css2?family=Smooch+Sans:wght@100..900&display=swap

Ensure that the URL points to a CSS file with @font-face properties

FONT WEIGHTS

Weights 400 and 700 are supported by default. Select other weights if your CSS file includes them.

100 <input type="radio"/>	Thin	600 <input type="radio"/>	SemiBold
200 <input type="radio"/>	ExtraLight	700 <input checked="" type="radio"/>	Bold
300 <input type="radio"/>	Light	800 <input type="radio"/>	ExtraBold
400 <input checked="" type="radio"/>	Normal	900 <input type="radio"/>	Heavy
500 <input type="radio"/>	Medium		

FALLBACK FONT

Arial

FALLBACK FONT FAMILY

Sans-serif

Cancel Save

1. **Name the font** - this is the name that will be shown in the font drop-down in the Editor. We recommend inputting the true font name here, but you are free to name it something else. For example, you may choose to name it semantically to indicate usage (Rubik - Body Font).
2. **Provide a Font URL** - Provide the URL of the font for Ascent360 to reference. **The URL needs to point to a CSS file with @font-face properties (see examples below).**
3. **Choose available font weights** - designate the font weights that you want to be available for this font in the editor. By default, font weights 400 and 700 (normal and bold) are enabled and cannot be disabled. Font weight settings are available on the *Title*, *Button*, *Paragraph*, and *List* content blocks. You may rename the weights after enabling them. If you enable weights other than 400 or 700, be sure that the link you provided contains @font-face properties with a configuration for these weights (this is usually something you configure before obtaining the link from Google Fonts or Font Library).
4. **Declare a Fallback Font** - Choose a font from the list of default fonts to serve as the fallback font in the event that the custom font is unavailable.
5. **Declare a Fallback Font Family** - Choose a font family from the list to serve as the secondary fallback in the event that neither the custom font nor the primary fallback font can be rendered.

Provide the Web Font URL

It's important to provide the right web font URL when adding the custom font; if the URL is wrong, Ascent360 won't be able to load your custom font. In order to be valid, the font URL must fulfill these criteria:

1. The URL needs to point to a CSS file with @font-face properties.
2. The CSS needs to be hosted in HTTPS.
3. Contains the font weights you intend to use.

To test this, enter your font URL into your browser - it should load with a page with plain text (the CSS file for this

font). Look for these elements:

Example: <https://fonts.googleapis.com/css2?family=Smooch+Sans:wght@100..900&display=swap>

```
/* vietnamese */
@font-face {
  font-family: 'Smooch Sans';
  font-style: normal;
  font-weight: 100 900;
  font-display: swap;

Brand Colors

The Brand Colors section of the Brand tab allows you to define up to 10 hex colors for quick access within the Email Editor and Landing Page builder.

You may type the color or click the swatch to select from a color picker.

Colors designated here will be shown in any of the color pickers within the editors for quick access.
